existing in the earth hostel down from
the sky**

(God Almighty said: In the Holy Quran (and the
sea held back **_27**

.Recent scientific studies have indicated that
the extension of tectonic faults to include the
seafloor and ocean floor. At the seafloor, there
are cracks in the Earth's crust and fissures
through which molten liquid flows from within
the Earth

”Modern science has discovered these cracks where molten lava flows into the water for hundreds of meters, and the sight suggests that the sea is burning!! This fact was told to us in the Qur’an when God Almighty swore by the sea that is set ablaze, in His saying: “And by the sea that is set ablaze

28_ God Almighty said in the Holy Qur’an (Then We sent down water from the sky and gave it to you to drink, and you are not its keepers .)

This verse contains a scientific miracle, indicating that the body does not store water after drinking it, but rather gets rid of it immediately to prevent the harm of storing it. This is what modern scientific facts have proven

.

29- God Almighty said in the Holy Qur’an : **“He creates you in the wombs of your mothers, creation after creation, within three darknesses.”** (Az-Zumar: 6) It is

evident in the amazing similarity between the Qur'anic description and modern science .

Scientific interpretation of "The Three Darknesses" :

Scientists explain these darknesses as follows :

1. **Abdominal darkness** : the mother's abdominal wall that surrounds the fetus .
2. **Uterus** : the wall of the uterus that protects the fetus .
3. **Placenta and its membranes** : the fetal membranes that surround the fetus and keep it inside the amniotic fluid .

This precise description, which was unknown to man at the time of the revelation of the Qur'an, is consistent with newly discovered scientific facts, indicating a scientific miracle in the Qur'anic text .

The miracle of wind pollination

God Almighty said in the Holy Quran: *And We sent the winds as fertilizing agents.* (Al-Hijr: 22).

Modern science has confirmed that winds pollinate plants by carrying pollen grains, and also contribute to pollinating clouds by carrying dust particles that help condense water vapor and cause rain to fall, a point the Qur'an has pointed out with astonishing scientific precision .

31- :God Almighty said in the Holy Quran

{ So whomever Allah intends to guide, He expands his breast to [contain] Islam. And whomever He intends to misguide, He makes his breast tight and constricted as if he were climbing up into the sky. Thus does Allah place defilement upon those who do not believe.} (Al-An'am: 125).

The miracle in the verse :

The verse indicates that whoever is misguided by God will have a chest that will feel tight, as if he is ascending to the sky, expressing a sense of suffocation. Modern science has proven that the higher a person ascends into the upper layers of the atmosphere, the lower the oxygen level, leading to shortness of breath and a feeling of suffocation. This corresponds with the Quranic expression with amazing precision, proving the scientific miracle of the Holy Quran .

32- :God Almighty said in the Holy Quran . [It is] the work of Allah, who perfected all things. Indeed, He is Acquainted with what you do. (An-Naml: 88)

Plate tectonics theory :

This theory explains that the Earth's crust consists of massive plates that slowly move

above a semi-liquid layer of the upper mantle. This movement causes earthquakes, volcanoes, and the formation of mountains, which is consistent with the Quran's description of the movement of mountains, even though humans believe them to be stationary .

33_ God Almighty said in the Holy Quran: (**And the earth with its cracks)**

Geology has proven that the Earth's crust is full of cracks and fissures .

During the time of Moses, magic was widespread, so God sent Moses with a staff that could turn into a snake to challenge the magicians. During the time of Jesus, medicine was widespread, so God sent Jesus to heal the blind and the leper, and to revive the dead with His permission, to challenge the doctors. During the time of Muhammad, poetry was

widespread, so God revealed the Qur'an to challenge the poets with its style .
